### How to use PANBIO COVID-19 Rapid antigen tests

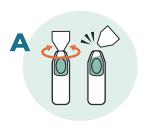

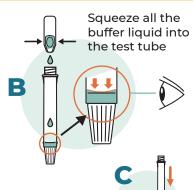

Blow your nose and wash your hands with soap

# 1 SET UP

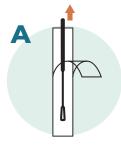

Twist the top off the buffer liquid vial

Place filled test tube in the assembled test tube rack

## 2 COLLECTION

Peel down and remove nasal swab

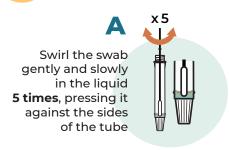

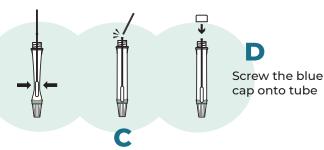

Roll **5 times** in **each nostril** (right and left nostril)

# 3

#### **PREPARATION**

Gently pinch the tube to extract the fluid while removing the swab

Break the swab at the break-point where there is an indentation and leave the swab in the tube

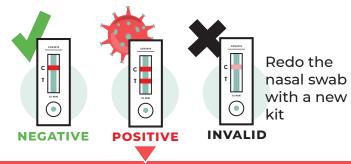

### **TESTING**

Place **5 drops** in the rapid response cartridge and wait **15 minutes**, no more

\* Place the test on a flat surface and do not touch it during the waiting time Here is an example of a positive test, negative and an invalid test
